

Make your own paper crib scene

- Colour the central section (with the short lines) using yellow crayon – this is the straw roof. Colour the panels with the long stripes using brown crayon – this is the wood of the stable.
- Colour the Holy Family – Mary usually wears blue
- Cut around the template and along all the thick dark lines
- Fold along the other lines to create the 3D stable shape, and glue the end panels together (fold the blank panel on the side of the roof in first, then the coloured panel on the side of the roof, then the glued panel, then finally the coloured panels either side of the front.). Fold along the stable doors so that they stand open – you should be able to see the Holy Family through the doors!
